

Grow Healthy, Grow Strong

Newsletter Issue #5 - June 2023

COMING UP NEXT MONTH:

There will be another health worker training led by Shan Huang (Nutrition Specialist) in early July, focussing on Nutrition Counselling skills. Burnet is also hosting a monitoring and evaluation workshop (led by Anna Roberts - Project Manager) from which the GROW team will benefit. We are also hoping to recruit another member of the GROW team, stay tuned!

GROW PROJECT UPDATE

How quickly this first project year has gone! June marks the end of year 1 for the GROW project. The first half of the year was dedicated to setting up the team, due processes with the provincial authorities, planning and designing the project.

So far we have completed one inception workshop, two health worker trainings and set up the Nutrition Advocacy Group which has had three regular monthly meetings. We have also prepared for our community engagement activities which are due to start from July onwards. These will involve setting up a group in each target community to host engagement events with GROW staff and health clinic staff to ensure co-design and we address the nutrition needs of that specific local area.

On behalf of the Burnet GROW team, we would like to take the opportunity to thank all the health facility staff and provincial health authorities for being a huge support to this project's first successful year. We could not have designed this project without you and look forward to Year 2 of implementation.

This project is funded through the Australian National Cooperation Program from July 2022 - June 2025 with generous support from the Jules McLean Family Fund
